

AutoCAD MEP Electrical Essentials

Course Description

This course is designed for the AutoCAD MEP user who wants to learn how to design, model, and make construction documents of electrical distribution systems used in commercial buildings. This course uses hands-on exercises to teach delegates how to design and draw electrical lighting and power systems and how to turn them into quality construction documents using AutoCAD MEP.

Suggested Course Duration: 1 day
Courseware provided: Yes

Objectives

The primary objective of this course is to teach students the basic functions necessary for using AutoCAD MEP.

Upon completion of the course, the delegate will be able to:

- Describe the electrical system design process and create a schematic diagram.
- Add devices and panels to an electrical system plan.
- Set system definitions, demand factors, and preferences, and use the Circuit Manager.
- Add electrical equipment, wiring, cable trays, and conduits to electrical drawings.
- Add labels and annotation symbols and create schedules.
- Publish electrical system layouts to Design Web Format™ (DWF™).

Who Should Attend

This course is designed for the new user of AutoCAD MEP.

Prerequisites

This course requires a working knowledge of a recent version of AutoCAD®, in addition to drafting, design, or engineering experience. It is also recommended that the delegate have a working knowledge of Microsoft® Windows®.

Course Outline

Using AutoCAD MEP to Design an Electrical Plan

- Designing an Electrical System
- Schematic Symbols and Lines
- Creating and Editing Ceiling Grids
- Adding and Modifying Devices and Panels

Managing and Reporting Circuits

- Electrical System Definitions and Demand Factor Styles
- Using the Circuit Manager

Creating an Electrical Plan and Reporting

- Adding Electrical Equipment
- Adding Wiring
- Adding Cable Trays and Conduit
- Using Circuit Analysis Tools

Annotating, Scheduling, and Publishing an Electrical Plan

- Annotating Electrical Drawings
- Scheduling
- Publishing an Electrical System Plan

Note: The suggested course duration is a guideline. Course topics and duration may be modified by the instructor based upon the knowledge and skill level of the course participants.
