

AutoCAD MEP Tools Application Essentials

Course Description

This course is designed for the AutoCAD MEP user who wants to learn how to use the Tools Application to enhance their drawings. This course uses hands-on exercises to teach delegates how to add enhanced containment, create duct and pipe fabrication isometrics, detect conflicts using Clash Reporter, and add and schedule hangers.

Suggested Course Duration: 1/2 day
Courseware provided: Yes

Objectives

The primary objective of this course is to teach delegates how to use the AutoCAD MEP Tools Application to enhance their drawings.

Upon completion of the course, the delegate will be able to:

- Use the Tools Application features.
- Detect and resolve object collisions using the Clash Reporter.
- Create and schedule fabrication isometrics, containment, and hangers.

Who Should Attend

This course is designed for the new user of AutoCAD MEP.

Prerequisites

This course requires a working knowledge of a recent version of AutoCAD®, in addition to drafting, design, or engineering experience. It is also recommended that the delegate have a working knowledge of Microsoft® Windows®.

Course Outline

- AutoCAD MEP Tools Application Features
- Adding and Modifying Enhanced Containment
- Checking for Conflicts
- Working with Fabrication Isometrics and Schedules
- Working with Hangers

Note: The suggested course duration is a guideline. Course topics and duration may be modified by the instructor based upon the knowledge and skill level of the course participants.
