All prices quoted exclusive of VAT.

Autodesk
Authorised Training Centre

For more information or to book, go to armada.co.uk or call 01527 834783

Armada has over 10 years' experience running specialist technical training courses. We are an authorised training provider for both Autodesk and Adobe, guaranteeing you a high standard of training and facilities.

Scheduled courses are hosted at our training centre in Bromsgrove in the Midlands, close to Birmingham and the M5/M6/M40/M42 motorway network. All courses can be provided on-demand for just your group, at either our training centre or your venue anywhere in the UK.

We offer:

- Expert trainers. Courses are run by highly experienced trainers who are experts in their respective fields. Trainers provide advice relevant to your circumstances and requirements based on their experience.
- Small group size, meaning that we can focus on the topics important to you.
- Practical training. You are given plenty of opportunity to practice the techniques for yourself as you learn.
- Competitive pricing.
- Assistance obtaining grants and funding. Grants for our courses are available to many companies. We can tell you if you're eligible, and guide you through the process.
- 30 day after-course support by email, to help you through any post-training issues.

For more information or to book call 01527 834783, or go to:

www.armada.co.uk/training

Technical writing courses

Courses for new and experienced technical writers, teaching the skills necessary to produce high quality user documentation in hard copy and online format.

AutoCAD and Autodesk training

Training on AutoCAD and Autodesk applications used in industries ranging from manufacturing and engineering to architecture, construction, entertainment and gaming.

We are an Autodesk Certification Centre, so can offer a certification programme that leads to 'Autodesk-certified' status in AutoCAD and other applications.

E-learning

Learn how to develop feature-rich websites, and create web-enabled e-tutorials.

Business writing and journalism

Courses for:

- Professional staff, teaching skills for producing clear and effective documents, proposals and reports.
- Journalists, press officers and anyone looking to develop journalistic skills and gain an understanding of the industry.

Print and design

Training at all levels, from those new to graphic design through to experienced designers, teaching how to master popular software applications to produce stunning printed documents.
