

Getting Started with RoboSource training course

Course objective

Getting Started with RoboSource training teaches RoboHelp authors how to use RoboSource to manage and collaborate on RoboHelp projects in a multi-author environment.

The course covers installing and configuring a RoboSource database, the procedures for technical authors to check files in and out and version control.

General information

- ▶ As an Adobe Authorised Training Centre (AATC), Armada meets the demanding standards specified by Adobe, ensuring a high standard of training.
- ▶ Hands-on exercises familiarise delegates with the concepts and operations.

Who should attend?

Technical authors using Adobe RoboHelp in a technical authoring environment where multiple authors work on the same project, and want to learn about the relevant RoboSource capabilities.

Duration

One day.

Courseware and certification

Delegates receive courseware to refer to throughout the course, and use as a refresher following the course. Delegates are issued with a certificate confirming they have attended and successfully completed the course.

For pricing and further information, please see:

Course outline

- ▶ **Module 1: Setting the scene**
RoboSource and RoboHelp components
General advice for multi-author projects
- ▶ **Module 2: Creating a new RoboSource database**
SQL Server installation overview
Creating a RoboSource database
Allowing other users to access your database
- ▶ **Module 3: Adding a RoboHelp project to RoboSource**
Adding a RoboHelp project to version control
Viewing the project in RoboHelp
- ▶ **Module 4: Opening a RoboSource-linked project on another PC**
Preparing for access
Windows Firewall settings
Opening a project for the first time
- ▶ **Module 5: Using RoboHelp's RoboSource-related features**
Understanding the integration
Getting the latest versions of files
Checking out individual topics to work on
Checking individual topics back into RoboSource
Reverting to a previous version of a specific topic
- ▶ **Module 6: Working with RoboSource Control Explorer**
Understanding the interface
Opening databases
Loading files into RoboSource
Properties and paths
Checking in/out, and managing file differences
