

Creating HTML emails with Adobe Dreamweaver

Course objective

Delegates learn how to quickly and easily design and build effective HTML emails.

The course covers the specific display requirements for webmail and email clients, and delegates will gain an understanding of the various distribution options available.

General information

- ▶ As an Adobe Authorised Training Centre (AATC), Armada meets the demanding standards specified by Adobe, ensuring a high standard of training.
- ▶ The trainer for this course is an Adobe Certified Instructor (ACI) for Dreamweaver.
- ▶ Hands-on exercises familiarise delegates with Dreamweaver concepts and techniques.

Who should attend?

Creating HTML emails with Adobe Dreamweaver training is ideal for newcomers to Dreamweaver.

Duration

One day.

Course materials and certification

Delegates work with files throughout the course, which they take with them to use as a refresher following the course. Delegates are issued with a certificate confirming they have attended and successfully completed the course.

What version of Dreamweaver is covered?

As an *on-demand* course, *Creating HTML emails with Adobe Dreamweaver* training can be based on any recent version of Dreamweaver.

This course is appropriate for Windows and Mac users alike.

Location, price and further information

This course is arranged *on-demand* for your group, meaning that the course can be run on a date and at a location that suits you, which may be our training centre in Bromsgrove (close to Birmingham and the M5/M6/M40/M42 motorway network) or your venue.
